

# Gaia

**L 44 P 54 H 92 H (seat) 47**

## Product sheet

Element	Material
Structure	Steel tube treated with non-toxic oven-baked paint.
Cover	European raw grain hides with chrome tannage, Aniline through-dyeing and pigment finishing.
Structure characteristics	The metal structure is held together by wire-welding. The seat is in multilayer with padding made out of foam-rubber.
Leather characteristics	The leather used has undergone and passed all the tests related to the colour fastness: dry rub, wet rub and light.

## Instructions for use

### Use and maintenance

This product is suitable for home or office use. Do not stand on the seat part, do not lean back on the legs and do not seat on the back rest. Do not carry out maintenance or repairs to the structure and contact the dealer for all requirements.

### Care of the leather parts

In order to keep the hide leather in good condition, dust it regularly with a soft, clean cloth. Once or twice a year we suggest to use the protective and nourishing products included in our "Care and cleaning Kit" which can be purchased separately through our retailers. Avoid using alcohol or other solvents which may corrode the hide. Never use steam. Do not use shoes cleaning products. Avoid rubbing the surface to be treated, plug down starting from the sides to the centre of the spot. Any possible spot of the leather surface can be removed using a soft cloth or some damp cotton wool and delicate cleaning products as mild soap and cleansing milk.

**Any possible surface imperfection is a natural leather characteristic (authenticity of the material). If it is directly exposed to sunlight, colour may be altered.**
